KRON®

Dear reader,

Kron International AB is a family owned company since 1871 with development, production and sales from our factory in southern Sweden. We produce cleaning tools mainly for Scandinavian market for household and professional customers.

Our business idea is to maintain high product quality with functional products and nice design that meet the user's wishes and we are proud of our products. Through powerful investment, we have streamlined our production and we have been able to maintain manufacturing in Sweden when many companies moved to low-wage countries in Asia.

Since we control all stages of production from pure raw material to finished product, we can also ensure and guarantee a high and even quality. We also strive for our operations to be carried out with the least environmental impact and minimize utilization of nature resources. This and that we are ISO certified enables us to sell our products to you with good conscience.
